

DIGIFORCE® 9310

burster

Press-Fit Control

Press-Fit Control for More Safety

- ✓ Low price makes press-fit control available for everyone
- ✓ Small in dimension with 111 x 111 x 185 mm and easy installable
- ✓ More effectiveness with less claims
- ✓ Higher productivity possible with fast data recording and short reaction time
- ✓ Best possible recognition of faulty parts with the flexible and universal evaluation method
- ✓ Fast change of produced item's data via PLC and by hand with up to 8 different measurement programs
- ✓ Protection of the tools by real-time control with reaction times of the switching signals < 10 ms

Application Sample „Hand Press“

Especially at simple hand presses where a 100 % control of the press-fit process is required, the DIGIFORCE® 9310 will pay off after a short time.

DIGIFORCE® 9310 keeps you updated and provides you with the important measurement results as a measurement curve or text – and if you prefer a globally understandable indication, you can set the DIGIFORCE® smiley to smile at the user when the press-fit process passed without objections.

With a wide selection of sensors we offer you the best and complete solution for almost all applications from one competent supplier.
